

I support XM Radio!! I live in Los Angeles and do a lot of driving, so I depend on the XM traffic channels to help me get through my day. There is no other radio station that gives me the traffic information I need, when I need it. There's no where else you can find 24 hour traffic and weather. Please don't take away our traffic and weather channels. XM users pay to get this kind of programming, so it's not fair for you to just take it away. Thanks!!
